Bemerkung in Betreff des Obstes. Die Zahl der Obstbäume nach dem Stande von 1879 siehe in Nr. 6 und 10, Seite 143 f. und Seite 218 f. Nach der dortigen Bemerkung sind die Angaben über den Obstertrag theilweise ungenügend und kann der Ertrag im Allgemeinen auf das Doppelte bis Dreifache des angegebenen geschätzt werden. Nach den thünlich berichtigten Angaben wären im Jahr 1882 geerntet worden: Kirschen 340 000, Birnen 360 000, Zwetschgen 170 000, Pflaumen 30 000, Kirschgen 60 000, Nüsse 4 000, Kastanien 1 000, im Ganzen 875 000 Centner, was, da die Obsternte nach den allgemeinen Erntebereichen (siehe Nr. 15 Seite 319) als eine ziemlich schlechte erscheint, der Wirklichkeit etwas entsprechen möchte.

Bemerkung in Betreff der Zwischenfrüchte. Auch die Angaben über die Zwischenfrüchte müssen sowohl was ihr Vorkommen als was ihre Erträge anbelangt, als vielfach unvollständig gelten. Nach den gemachten Angaben wären etwa an Mais 3 000, an Bohnen 20 000, an Erbisen 400, an Kraut 31 000, an Weizen 300, an Erbsenfrüchten 1 000, an Futterrüben 26 000, an Zwiebeln 1 000, an Hausfaamen 5 000, an Hausbrot 1 000 Centner in Zwischenfrucht geerntet. In Wirklichkeit wird der Ertrag erheblich, theilweise um das Mehrfache höher sein.
