into the boat, and at twice goeth so fetch over the other two women.

The Hydraulic Dancer.

Procure a little figure of cork, which you may dress as your fancy dictates. In this figure place a small hollow cone, made of thin leaf brass.

When the figure is placed on a jet d'eau, that plays in a perpendicular direction it will be suspended on the top of the water, and perform a great variety of amusing motions.

If a hollow ball, of very thin copper, of an inch in diameter, be placed on a similar jet, it will remain suspended, turning round, and spreading the water all about it.

The accompanying device of Atlas carrying the world on his shoulders, is an extremely appropriate figure for this pleasing experiment.
