GERARDI CREMONENSIS VIRI CLARISSIMI

mi Theorica planetarum feliciter incipit.

CAPITVLVM FIGVRAE SOLIS.

Irculus eccētric⁹ uel egressæ cuspidis uel
 egrediētis cētri est q nō habet cētrū su
 u3 cū centro mūdi. Pars eccentrici: quæ
 maxie remouet a cētro mūdi dicit̄ aux:
 uel longitudo lōgior. S3 pars quæ maxie accedit ad
 ip̄n3 dicit̄ oppositū augis: uel lōgitudo p̄prior. Duo
 ergo loca circuli: quæ sunt iter augē: & opposituz au
 gis dicit̄ longitūdiēs mediæ: mouet̄ aut̄ sol naturali
 ter: & p̄prio motu ab occidēte i oriētēz i suo circulo
 eccētrico quolibet die naturali 39. mūtis & 8. secun
 dis æqualiter sēp: mundus uero rotat̄ ab oriēte i occi
 dētem æqualiter: quare oportet ut sol moueat̄ i or
 be signoz iæq̄liter. medi⁹ mot⁹ solis dicit̄ arc⁹ zodi
 aci cadēs iter lineā exeuntē a cētro terræ: usq3 ad locū
 arietis: & iter lineā exeuntē ab eodē cētro terræ: usq3
 ad firmamētū equidistātem a lineā exeūtē a cētro eccē
 trici p̄ centrum solis ad zodiacuz. Verus mot⁹ solis
 dicit̄ arc⁹ zodiaci cadēs iter caput arietis: & lineaz
 exeūtē a cētro terræ p̄ centrū solis ad firmamētū.
 Aequatō solis dicit̄ arc⁹ zodiaci cadēs inter uey mo
 tū & mediū ei⁹: quæ æquatō nulla ē sole existēte i au
 ge uel i opposito augis. Ip̄so aut̄ existēte i lōgitudini
 bus mediis ē maxia. Argumētum solis dicit̄ arc⁹ zo
 diaci cadēs iter augē & lineā termiantem mediū mo
 tū solis: aux solis i secūda significatōe dicit̄ arcus
 zodiaci cadēs inter caput arietis & lineā quæ trāsit p̄

augem eccentrici, in una autem medietate coeli, s. in
 oriente medi⁹ mot⁹ est maior uero: & tunc ad iuenien
 dū uey motū subtrahenda ē æquatō & remāebit ue
 rus mot⁹, in alia uero medietate: hoc ē in occidēte
 uerus motus est maior mediō: quare tunc equatō ē
 addenda.

• Theorica Solis •

Z

INVENIRE autē mediū motū solis ē inuenire quēdam
arcum zodiaci qui sic se habet ad totū zodiacū quē
admodū arcus eccentrici p̄rāsitus a sole se habet ad
totū eccentricū: & hic iuenit̄ p̄ lineā æquidistantē ut pa
tet ī figura sequēti.

Theorica mediū motus plane tarum.
